## PROFESSIONAL SUMMARY

Generative AI and Automation Engineer with hands-on experience building AI-powered SaaS products, LLM-integrated workflows, retrieval-augmented generation (RAG) applications, vector-search pipelines, and conversational voice agents. Experienced with OpenAI APIs, structured outputs, prompt engineering, model fine-tuning, speech-to-text/text-to-speech, and tool-driven automation. Combines AI integration with full-stack engineering, data architecture, testing, and production delivery.

## TECHNICAL SKILLS

**Generative AI & LLMs:** OpenAI APIs, structured outputs, prompt engineering, AI agents, RAG, embeddings, vector databases/search, tool/function calling, fine-tuning, Sarvam AI, Whisper, STT/TTS

**AI Automation & Voice:** n8n, webhooks, scheduled workflows, conversational voice AI, Exotel telephony, Telegram API, WhatsApp/Evolution API, third-party integrations

**Programming:** TypeScript, JavaScript, Python, SQL

**Backend & Data:** Node.js, Express, Fastify, REST APIs, WebSockets, PostgreSQL, Supabase, Prisma, Drizzle ORM, MongoDB, Redis, BullMQ, row-level security

**Frontend:** React, Next.js, Tailwind CSS, HTML5, CSS3

**Testing & Deployment:** Playwright, end-to-end/smoke testing, Git/GitHub, Docker, Docker Compose, Vercel, Caddy, Linux/VPS, Razorpay, Google Drive, fal.ai

## PROFESSIONAL EXPERIENCE

**AI Automation Developer & Full-Stack Developer, Sirah Digital, Chennai** | **Oct 2025 to Present**

• Build AI-enabled SaaS applications, CRM capabilities, and business automation across healthcare, manufacturing, and operational workflows.

• Develop multi-tenant architecture, authentication/RBAC, subscription flows, database schemas and migrations, API integrations, and real-time features.

• Integrate LLM APIs, structured outputs, retrieval-based knowledge workflows, speech services, and external business systems into end-to-end products.

• Implement and validate voice-agent workflows spanning conversation handling, lead updates, site-visit booking, telephony adapters, and speech processing.

• Contribute across the product lifecycle: backend and UI development, automated testing, deployment, debugging, and production support.

## SELECTED PROJECTS

**Sirah Voice AI, Real Estate Voice-Agent SaaS**
Production voice-agent product built with Next.js, Fastify, PostgreSQL/Drizzle, and modular AI/telephony adapters. Supports conversational lead qualification, project-information retrieval, lead updates, site-visit slot checks and booking, call records, and conversation summaries. Integrates Sarvam speech services and Exotel telephony with automated call-flow testing.

**Evokz ACE, Multi-Tenant AI Creative Automation SaaS**
Built with Next.js, TypeScript, PostgreSQL, Prisma, OpenAI Structured Outputs, and fal.ai image generation, with Razorpay, Google Drive, and WhatsApp integrations. Automates scheduled content generation and deterministic image composition; includes usage tracking, per-client budgets, concurrency-safe updates, retry/recovery workflows, and Docker/Caddy/VPS deployment.

**AI Telegram Voice Agent**
Integrated OpenAI conversation handling, Whisper speech-to-text, text-to-speech, and Telegram APIs for voice-message interactions, contextual responses, and persistent conversation memory, connecting speech processing with automated messaging workflows.

**KnowMind Universe, Assessment & Reporting SaaS**
Developed assessment and scoring workflows, personalized reports, coach review/approval, cohort management, and WhatsApp/email delivery. Implemented row-level security and real-time synchronization with fallback behavior, supported by Playwright end-to-end and smoke tests.

**AI Healthcare & Factory Operations CRM**
Contributed to Al-Shifa and IWIS healthcare platforms and factory CRM workflows across production, inventory, logistics, finance, and reporting, connecting application interfaces with backend data and operational processes.

## ADDITIONAL WORK

Fortune Innovatives Website & CMS • Sirah Digital 3D Website & CMS

## EDUCATION & RECOGNITION

**B.E. Computer Science and Engineering**, Peri Institute of Technology, Chennai • CGPA: 8.3/10 • Graduated May 2026

**Sirah Digital Appreciation Certificate:** Recognized for adaptability, collaboration, and workplace contribution.
